state the following: I am a practicing veterinarian licensed in New York State, employed at the [Redacted] Animal Hospital. On 4/6/92 I examined 6 horses at the [Redacted] Humane Society, at the request of the New York State Police.

The condition of the horses are as follows:
 #1 Curly Hair Appaloosa 7-9 yrs old gelding: very poor debilitated condition, emaciated and 5% dehydrated (significant dehydration). He has a nasal discharge and respiratory distress with increased expiratory effort. The right femur has a midshaft bony protuberance. This horse has difficulty eating and has an abscessed tooth - Right lower jaw. His penis is swollen and he is unable to retract it into his sheath (paraphimosis) feet are overgrown. This horse is obviously in a state of extreme neglect.
